---

Waterborne low VOC coating system  
for cabinetry, joinery, shop fittings,  
kitchens & doors

---

# AquaLAQ™

---

Resene AquaLAQ is an innovative spray-applied lacquer system for cabinetry, joinery, shop fittings, kitchens, doors and the like. The core system is isocyanate free, single pack and waterborne.

---

The core system comprises:

**AquaLAQ Quick Dry Primer/Sealer** is a low VOC, unique waterborne sealer that will seal off grain raising in MDF. Two coats will typically achieve full coverage, and provide a sound, flat, and high quality substrate ready to be top coated, with minimal sanding.

**AquaLAQ Colour Coat** is a low VOC single pack waterborne acrylic with an extremely durable finish, available in the Resene Total Colour System, including metallics. One or two coats are required to achieve full coverage, can be top coated to improve durability, or change the desired finish from Satin to Matte, Gloss or anti-fingerprint Soft Touch.

**AquaLAQ Clear Coat** is a low VOC single pack which is highly versatile and can be used over the AquaLAQ Colour coat and with most interior stains, teak oils and treatments. Available in Matte, Satin, Gloss and anti-fingerprint Soft Touch.

AquaLAQ is applied by professionally trained applicators.

# AquaLAQ Quick Dry Sealer

**Extremely quick drying waterborne sealer available in clear and white.**

AquaLAQ Quick Dry Sealer is unique in that it will seal off grain raising in MDF boards, and drastically reduce sanding labour. Two coats are normally all that is required to achieve full coverage, and provide a sound, flat, and high quality substrate ready to be top coated, with minimal sanding.

The clear sealer has also been designed for use on timber and timber/paper veneers which would normally be susceptible to moisture. It is extremely well suited to natural timbers to highlight their warmth and grain, whilst providing a sealed substrate suitable for top coating.

Quick dry sealer can be ready for application of the next coat in less than 30 minutes, and due to minimal sanding, creates an ultra fast turnaround if required\*

Environmental Choice NZ accredited

## Features

- Waterborne, water clean up
- Low odour
- Minimal wet overspray
- Excellent coverage
- Fast dry
- Clear and White
- Easy to sand
- Low VOC
- Manufactured by Resene in NZ
- Environmental Choice NZ accredited

## Benefits

- No dangerous goods management required
- New Zealand made
- Increased productivity - minimal sanding required
- Little to no odour
- Enables a complete waterbased system to be applied to MDF efficiently and economically
- Resene promise of quality

\* 30 min recoat is based on a Controlled environment, normally this means a standard industry approved spray booth, and a drying room capable of maintaining 20degrees C, rH of less than 75%, and good airflow of 12 air changes per hour or more

# AquaLAQ Colour Coat

Single pack waterborne acrylic with an extremely durable finish.

AquaLAQ Colour Coat is touch dry in minutes\*, dries to a natural satin finish, with a smooth silky feel. The new generation rheology of the product means less work in application and reduced or eliminated sanding and reapplication. It can be top coated with AquaLAQ Clears or 2 pack urethanes if required.

AquaLAQ Colour Coat is available in the complete Resene Total Colour System, which includes Resene Metallic finishes, a selection of 1000's of colours. Special colours can be matched on request.

Environmental Choice NZ accredited

## Features

- Waterborne, water clean up

- User friendly
- Increased productivity
- Resene colour in Resene product
- Resene promise of quality
- Little to no odour

\* 15 min touch dry time is based on a Controlled environment, normally this means a standard industry approved spray booth, and a drying room capable of maintaining 20degrees C, rH of less than 75%, and good airflow of 12 air changes per hour or more

# AquaLAQ Clear Coat

**A single -pack, waterborne clear, available in matte, satin, gloss and anti-fingerprint soft touch.**

AquaLAQ Clear Coat has excellent coverage and dries super fast under the correct conditions, to a hard durable UV stable finish.\*

AquaLAQ Clear Coat is recommended over Colour Coat where extra durability or if gloss levels other than satin, is required.

Clear Coat is also an ideal top coat on natural timber finishes, that have been sealed with AquaLAQ Quick Dry Sealer.
